This profile last updated on 14 September 2016

Atlantic cod W Greenland inshore

 Fishery:  W Greenland inshore  Greenland 1A-E inshore  Greenland  Longlines

IDENTIFICATION

SCIENTIFIC NAME
Gadus morhua
SPECIES NAME(S)

Atlantic cod

COMMON NAMES

Greenland cod, West Greenland fjords cod

STOCK IDENTIFICATION

The inshore Greenland cod component was assessed together with the offshore cod stocks prior to 2012. However, multiple stocks are thought to contribute to the fishery in this region: south and east Greenland cod, offshore west Greenland cod and Icelandic cod, and methods for separating catch origin are being developed (ICES, 2015).

RECOMMENDATIONS
RETAILERS & SUPPLY CHAIN

- Start a fishery improvement project (FIP) to address the lack of publicly available information on this fishery. For advice on starting a FIP, see SFP's Seafood Industry Guide to FIPs and other resources at <https://www.sustainablefish.org/Programs/Professional-Guidance/FIP-Toolkit-Resources>.
- Encourage scientists to share their studies/publications with FishSource by commenting on the profile and uploading a hyperlink to the document.
- Work with the government and scientists on the collection of data and make them accessible online.
