

Atlantic cod W Greenland offshore

Fishery:  Greenland 1A-E offshore  Greenland  Bottom trawls

IDENTIFICATION

SCIENTIFIC NAME

Gadus morhua

SPECIES NAME(S)

Atlantic cod

STOCK IDENTIFICATION

West Greenland offshore cod was previously assessed together with East and South Greenland offshore cod prior to 2016, and additionally with inshore cod prior to 2012. Tagging studies indicate a separation between West Greenland and other offshore components, but the current low West offshore stock size may be a factor in this structuring (ICES, 2015).

RECOMMENDATIONS

RETAILERS & SUPPLY CHAIN

- This profile is not currently high on our priority list for development, and we can't at this time provide an accurate prediction of when it will be developed. To speed up an evaluation of the sustainability status of lower priority fisheries we have initiated a program whereby industry can directly contract SFP-approved analysts to develop a FishSource profile on a fishery. More information on this External Contributor Program is available at <https://www.sustainablefish.org/Programs/Science/External-Contributor-Program>.
