

# European plaice North Sea and Skagerrak

Fishery: [EU/Norway](#) [United Kingdom](#) [Seine nets](#)

## IDENTIFICATION

### SCIENTIFIC NAME

*Pleuronectes platessa*

### SPECIES NAME(S)

European plaice

### STOCK IDENTIFICATION

It has been recently determined; based on larval drift, otolith characteristics, genetics, and tagging studies; that plaice in the North Sea and Skagerrak conforms a single stock, and a combined assessment and advice was conducted in 2015 (ICES, 2015a,b).

- [International Council for the Exploration of the Sea \(ICES\)](#)

## ASSESSMENT

### Strengths

- A precautionary plaice and sole management plan is in operation; goal of stage one (recovery plan) is achieved. The plaice spawning stock is at a historical high and increasing further.
- Mixed fisheries advice takes into consideration the status of other North Sea species.
- Uncertainty in the assessment has been resolved.
- Data about retained and discarded species, namely PET species, and the interaction with sensitive habitats is available.

### Weaknesses

- Bottom trawls, with high bycatch rates and impacts on the sea bed, dominate catches.
- Rules of the second stage of the management plan are not yet defined. Changes in management measures have contributed to increased discarding of undersized plaice in the southern North Sea.

## SCORES

### Management Quality:

Management Strategy	Managers Compliance	Fishers Compliance
≥ 6 to ≥ 8	8.6 to 10	9.1 to 10

### Stock Health:

Current Health	Future Health
< 6 to 10	< 6 to 8.9

## FIPS

- United Kingdom European plaice & lemon sole - seine/rawl:

Stage 5 , Progress Rating A , Type: Fip , Evaluation Start Date: 1 Nov 2018

## MSC

- SFSAG Northern Demersal Stocks:

MSC Recertified

## RECOMMENDATIONS

### RETAILERS & SUPPLY CHAIN

- Monitor the progress in closing out conditions placed upon the MSC certification of the fishery and if agreed timelines are met. Offer assistance in closing conditions where possible.
