

Greenland halibut Baffin Island & W Greenland offshore

Fishery:  Baffin Island & W Greenland offshore  Canada SA 0  Canada  Gillnets and entangling nets

IDENTIFICATION

SCIENTIFIC NAME

Reinhardtius hippoglossoides

SPECIES NAME(S)

Greenland halibut, Greenland turbot (US-Canada)

STOCK IDENTIFICATION

Although scientific advice is provided separately for a northern and a southern component of Greenland halibut within NAFO Subareas 0 and 1 (excluding 1A inshore), there is little to indicate that these are separate stocks (Pomilla et al, 2008). Both advice and TACs are set separately for several stocks in the West Greenland fjords (NAFO Division 1A inshore). These are not covered by this profile.

RECOMMENDATIONS

RETAILERS & SUPPLY CHAIN

- This profile is not currently high on our priority list for development, and we can't at this time provide an accurate prediction of when it will be developed. To speed up an evaluation of the sustainability status of lower priority fisheries we have initiated a program whereby industry can directly contract SFP-approved analysts to develop a FishSource profile on a fishery. More information on this External Contributor Program is available at <https://www.sustainablefish.org/Programs/Science/External-Contributor-Program>.
