

European anchovy Aegean Sea

IDENTIFICATION

SCIENTIFIC NAME

Engraulis encrasicolus

SPECIES NAME(S)

European anchovy

STOCK IDENTIFICATION

The stock structure of European anchovy in the Mediterranean has been studied by several authors (e.g. Pla et al., 1996; Zarraonaindia et al., 2012; Giannoulaki et al., 2013; Viñas et al., 2013; Oueslati et al., 2014), is quite complex and considered with “surprisingly high overall heterogeneity” (Oueslati et al., 2014). Thus here we assumed the division of **management units** presented by the General Fisheries Commission for the Mediterranean (GFCM) (GFCM, 2008). This profile considers the geographical subarea 22 (Aegean Sea) (*GFCM 2016*).

RECOMMENDATIONS

RETAILERS & SUPPLY CHAIN

- This profile is not currently high on our priority list for development, and we can't at this time provide an accurate prediction of when it will be developed. To speed up an evaluation of the sustainability status of lower priority fisheries we have initiated a program whereby industry can directly contract SFP-approved analysts to develop a FishSource profile on a fishery. More information on this External Contributor Program is available at <https://www.sustainablefish.org/Programs/Science/External-Contributor-Program>.

Fisheries

Within FishSource, the term "fishery" is used to indicate each unique combination of a flag country with a fishing gear, operating within a particular management unit, upon a resource. That resource may have a known biological stock structure and/or may be assessed at another level for practical or jurisdictional reasons. A fishery is the finest scale of resolution captured in FishSource profiles, as it is generally the scale at which sustainability can most fairly and practically be evaluated.

 ASSESSMENT UNIT	 MANAGEMENT UNIT	 FLAG COUNTRY	 FISHING GEAR
Aegean Seamng	Greece/GFCM	Greece	Purse seines
		Turkey	Purse seines

Management Unit

 MANAGEMENT UNIT	ORGANIZATION	FISHING AREA
Greece/GFCM	Greek Ministry of Rural Development and Food, General Fisheries Commission for the Mediterranean (GFCM)	FAO 37.3.1, GFCM/GSA 22
