

# Leopard coral grouper Tolo Bay and Banda Sea

## IDENTIFICATION

### SCIENTIFIC NAME

*Plectropomus leopardus*

### SPECIES NAME(S)

Leopard coral grouper, Leopard coral grouper

### COMMON NAMES

Kerapu sunu

### STOCK IDENTIFICATION

An Indonesian multispecies fishery, operating with handline and bottom longline, captures Snappers nei, Groupers nei and other reef fishes. There is as yet no consensus as to the stock structure of these species. This profile may undergo restructuring in the future as new information comes to light. This profile refers to Tolo Bay and Banda Sea (WPP-714) assessment unit.

# Fisheries

Within FishSource, the term "fishery" is used to indicate each unique combination of a flag country with a fishing gear, operating within a particular management unit, upon a resource. That resource may have a known biological stock structure and/or may be assessed at another level for practical or jurisdictional reasons. A fishery is the finest scale of resolution captured in FishSource profiles, as it is generally the scale at which sustainability can most fairly and practically be evaluated.

 ASSESSMENT UNIT	 MANAGEMENT UNIT	 FLAG COUNTRY	 FISHING GEAR
Tolo Bay and Banda Seamng	Tolo Bay and Banda Sea (WPP-714)	Indonesia	Bottom-set longlines
			Handlines hand operated

# Management Unit
