

# Black pomfret Aru Sea, Arafura Sea and Eastern of Timor Sea

## IDENTIFICATION

SCIENTIFIC NAME

*Parastromateus niger*

SPECIES NAME(S)

Black pomfret

COMMON NAMES

Bawal hitam (Bahasa Indonesia), Bawal tambak (Aceh)

STOCK IDENTIFICATION

No information about population structure and no assessment for black pomfret could be found in Indonesian waters. Indonesian catch records for this species exist in both the Indian and Pacific Ocean in FAO Global Production Statistics (*FAO 2018*). A management unit is considered within Aru, Arafura and East Timor Seas (FMA 718).

# Fisheries

Within FishSource, the term "fishery" is used to indicate each unique combination of a flag country with a fishing gear, operating within a particular management unit, upon a resource. That resource may have a known biological stock structure and/or may be assessed at another level for practical or jurisdictional reasons. A fishery is the finest scale of resolution captured in FishSource profiles, as it is generally the scale at which sustainability can most fairly and practically be evaluated.

 MANAGEMENT UNIT	 FLAG COUNTRY	 FISHING GEAR
Aru Sea, Arafura Sea and Eastern of Timor Sea (WPP-718)	Indonesia	Gillnets and entangling nets

## Management Unit

 MANAGEMENT UNIT	ORGANIZATION	FISHING AREA
Aru Sea, Arafura Sea and Eastern of Timor Sea (WPP-718)	Ministry of Marine Affairs and Fisheries of the Republic of Indonesia (KKP-RI)	FAO 71, Indonesian WPP-RI 718 (Aru Sea, Arafura Sea and Eastern of Timor Sea)
