

Gold-spot octopus China

IDENTIFICATION

Source: UniProt Consortium, 2002-2013

SCIENTIFIC NAME

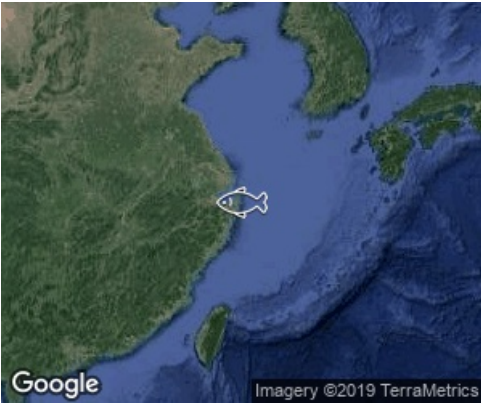

Amphioctopus fangsiao

SPECIES NAME(S)

Gold-spot octopus

STOCK IDENTIFICATION

Gold-spot octopus stock structure is unclear notwithstanding the indications of a separate biological stock in the [East and South China Seas](#) and another one in the Yellow Sea but ([Lv et al. 2013](#)). The current profile covers the Chinese management unit except for the existing stocks mentioned.

Fisheries

Within FishSource, the term "fishery" is used to indicate each unique combination of a flag country with a fishing gear, operating within a particular management unit, upon a resource. That resource may have a known biological stock structure and/or may be assessed at another level for practical or jurisdictional reasons. A fishery is the finest scale of resolution captured in FishSource profiles, as it is generally the scale at which sustainability can most fairly and practically be evaluated.

 MANAGEMENT UNIT	 FLAG COUNTRY	 FISHING GEAR
China	China	Single boat midwater otter trawls
		Vertical Lines

Management Unit

 MANAGEMENT UNIT	ORGANIZATION	FISHING AREA
