

Kiddi shrimp Kerala

IDENTIFICATION

SCIENTIFIC NAME

Parapenaeopsis stylifera

SPECIES NAME(S)

Kiddi shrimp, Sungta, karikkadi shrimp

STOCK IDENTIFICATION

Kiddi shrimp is caught along both Eastern and Western Indian coasts (*Dineshbabu 2005*)(*Maheswarudu et al. 2015*). No information could be found about the stock structure or of an assessment being conducted thus a management unit regarding the Kerala state is considered (*CMFRI 2018*).

Fisheries

Within FishSource, the term "fishery" is used to indicate each unique combination of a flag country with a fishing gear, operating within a particular management unit, upon a resource. That resource may have a known biological stock structure and/or may be assessed at another level for practical or jurisdictional reasons. A fishery is the finest scale of resolution captured in FishSource profiles, as it is generally the scale at which sustainability can most fairly and practically be evaluated.
